

ESRI GIS Developer, Auckland or Wellington, New Zealand

Eagle Technology Group is the distributor of the world's leading Geographic Information Systems (GIS) software products and services. With a large pool of experienced GIS professionals in New Zealand, we deliver enterprise geospatial information solutions to organisations in both public and private sectors across New Zealand.

As an expert GIS developer, you've got the complete package: experience & qualifications to back yourself, as well as the skills and personality to participate in a high energy team.

You will have extensive knowledge of ESRI ArcGIS products, in particular ArcGIS Server & ArcObjects and will be well versed in application development languages such as Microsoft .Net, Silverlight or Adobe Flex.

You will have a thorough understanding of the software development lifecycle, object oriented development practices, and DBMS knowledge.

You will also be self motivated with a logical and analytical mind, a natural born problem solver, all of which means a perfect fit for us.

This role offers a significant level of variety, which reflects the diversity of the projects we deliver. There will be periods of working within Eagle's office environment and may involve visits to customer sites.

If you are interested in exploring this opportunity in more depth, please email your CV, contact details, availability (for both interview and job commencement) and an indication of your salary expectations to : hr@eagle.co.nz

All applications will be treated in utmost confidence.
